## SOFT COAL PRICES ARE EXORBITANT

New York, April 1.—Ellis Searles, speaking in behalf of the United Mine Workers of America, declared tonight that the 27 per cent. wage increase just granted bituminous mine workers does not justify the price of 65 cents to \$1.50 a ton which operators have announced will have to be made.

He added that the increase in cost of production could not exceed 40 to 50 cents a ton and he disclaimed responsibility on the part of the workers for the price advances.

Union officials, still gathered here today after yesterday's meeting at which the new wage agreement was ratified, conferred on the effects of the wage increase and the announced intention of mine owners to advance prices. It was after this informal conference that Mr. Searles issued the following statement:

"When Fuel Administrator Garfield granted the miners 14 per cent. increase in wages last fall, he said the 14 per cent. could and should be absorbed by the operators, and that they could afford to pay it out of their profits. But the operators did not pay the increase out of their profits. Instead, they passed the increase on to the public on at least 30 to 35 per cent of the coal by increasing their selling price.

"The present increase in wages adds 13 per cent. to the pay of the miners above the 14 per cent. granted by Garfield. If Garfield was right in saying they could absorb and pay the 14 per cent. out of their profits, then they certainly can at least absorb the 13 per cent. now instead of passing it on to the public.

"We see operators quoted in the newspapers as saying they will advance the price of coal \$1.25 to \$1.50 a ton because of the increase in wages granted to the miners. Such an increase would not be justified by the increase in wages.

"The wage increase was 27 per cent. This means that the increase in the cost of production cannot exceed 40 to 50 cents a ton. Then, why should the operators boost the price \$1.25 or \$1.50 a ton, even if they pass

all of the increase on to the public?

"If the operators make an unreasonable or unnecessary increase in the price of coal the miners want the public to know that they are not responsible for it."

Union officials asserted that any unjustified advance of prices would cause serious dissatisfaction and unrest among miners.

"There will never be peace in the coal industry as long as the operators continue to exact profits from the public on the grounds that they are meeting a wage advance to the miners," said a union official. "The operators refuse to go back to the pre-war days of legitimate profits. They insist on continuing the practice of exacting enormous profits and as long as they do this the miners will not be satisfied."

In hitting price restriction by the fuel administration at this time, the union officials declared that the government had "erred" and indirectly played into the hands of the operators. As 75 per cent. of the nation's coal contracts are made about April 1, the miners say lifting the price ban at a time when so many buyers are in the market is sure to send prices higher than ever before.

Union officials called on statisticians of their own number to submit figures in support of their contention that the operators were attempting to "extort" excess profits from the public at the expense of the miners. They said that until yesterday wages had been raised 43 cents a ton. In the same period, they contended, the operators raised the price of coal at the mine \$1.31 per ton and the soft coal retailers advanced their prices \$2.38 per ton.

"Seeing the 43 cents raise multiplied in this fashion, is making the workers disgruntled," union leaders said, "and the only cure is a reversion to the time of normal profits."

Chevrolet "Four-Ninety" Touring Car, \$795.00, f. o. b. Flint, Mich.

Enjoyment ceases to be complete when you feel it is extravagant.

The certainty that a car conserves your money—that its every feature renders you the utmost service, is the most gratifying feeling about it.

That is why more people buy Chevrolets in preference to heavier types that are a burden on the pocketbook.

The experience of veteran motorists has proven that the Chevrolet affords you all the feelings essential to complete enjoyment.

Pride in its appearance and absolute confidence in its dependability alone guarantee your peace of mind.

Yet in addition the Chevrolet offers every riding and driving comfort and equipment convenience.

These things are to be enjoyed equally in a Chevrolet as in other cars. But in the Chevrolet alone can you enjoy them at such low cost.

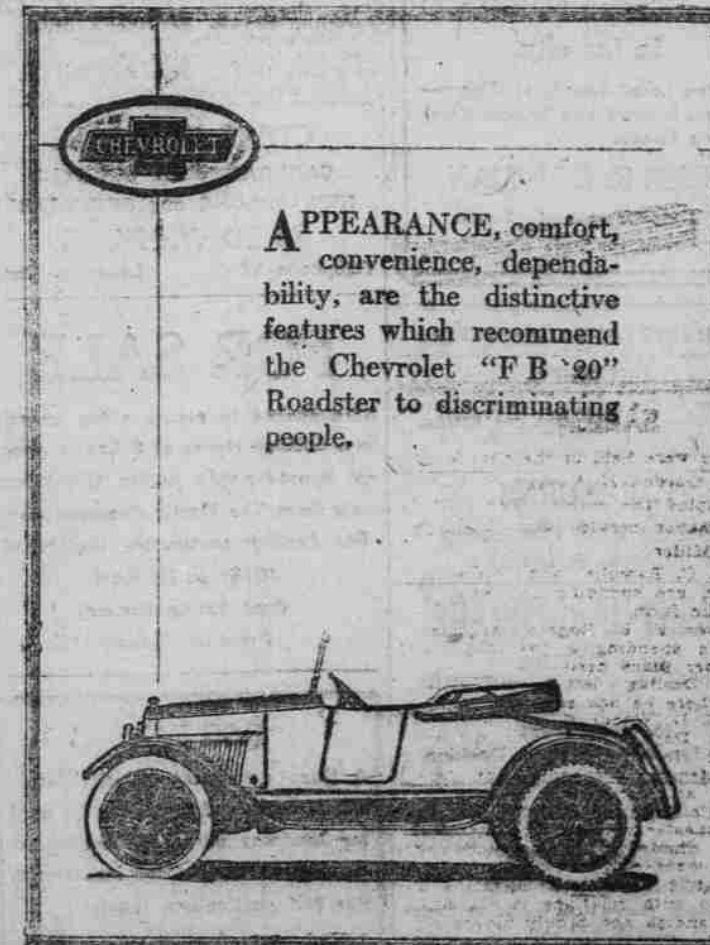

That is the peculiar attraction of the Chevrolet — all essential features other cars afford, but at lower cost.

Do not entertain any doubts on this score. Give us an opportunity to show you how and why this is true.
